BAGS TECHNICAL SPECIFICATIONS

HEAVY DUTY WHEELS

All Mares bags include rugged and durable construction wheels. With a diameter of 9 cm and a with a tire tread 3cm wide, they can maneuver over streets, through airports and to your dive with no problem. All Mares bag wheels are attached with stainless steel screws. This system makes the wheels much more durable than bags using rivets

BACKPACK SYSTEM

With little effort a large piece of luggage can be transformed into a comfortable Backpack. A big pocket positioned under the bag's case contains two big and soft shoulder straps. In a minute your wheeled bag becomes a backpack. Additionally, the innovative Mares x-strap System converts the traditional handles, by attaching to a metal snap hook, into the shoulder straps of the bag.

TELESCOPIC HANDLE

Mares biggest bags, ideal for long trips, are furnished with a telescopic handle. Hidden into a pocket placed on the top of the bag, when needed the handle can be extended making it very easy to pull and maneuver the bag, even when filled with diving equipment.

HARD CASE

The hard case is the ideal solution to store your valuable diving equipment. Designed and tested by divers looking for the very best in terms of capacity and durability, the hard case is separated into two internal compartments, one for clothing and one for equipment.

HARD BOTTOM

All the biggest bags of the new Cruise collection, are reinforced with a hard bottom. The hard bottom makes the bag more stable and tear resistant. The storage space is stronger and offers better protection. The hard bottom makes the attachment of the wheels and the telescopic handle much more durable. The result is really a strong bag.

PROTECTIVE COVER

Keeps your bag clean. A fashionable black cover with a big Mares logo printed on top will protect the bag during the longest voyage. The nylon cover will protect your bag from rain, dust, stains and scratches. A hole on top of the cover allows for use of the telescopic handle when covered.

SPIRAL ZIPPERS

All Mares bags come with Spiral Zips. These zips make it really easy to open and close the pockets no matter which direction they are facing.

DETACHABLE POCKET

An extremely useful additional bag. A small beauty case ideal for travel or during a tour. A mirror is included. The Cruise Roller comes with a detachable pocket ideal to store the small things we always want to bring with us even when we go diving.

HEAVY DUTY CONSTRUCTION

All Cruise bags are reinforced with stainless steel rivets and screw providing extra durability and extra protection. Components are heavy duty stitched and attached with stainless steel rivets between the hard components (bottom, case, telescopic handle) and the material, all to increase durability.

BUSINESS CARE DESIGN

Several bags in the new Cruise collection come with a business dedicated area. The Cruise Journey and Cruise Office are reinforced and padded to properly protect your laptop, Logbook, MP3, Mobile phone, Agenda, Pens and all your other business tools.
